FLEX 14X14

FLEXIBLE ENCAPSULATED

FLEX 14X14 Flexible Encapsulated is a versatile and flexible lighting solution designed for creative architectural and decorative lighting applications. Its flexible construction allows the fixture to easily bend around curves, contours and different architectural profiles, making it ideal for creating continuous and uniform illumination. The fully encapsulated design provides enhanced protection against dust, moisture and environmental conditions, while delivering smooth, dot-free light distribution. Lightweight and easy to install, the fixture can be cut and configured according to specific project requirements, offering excellent brightness with reliable and consistent illumination.

With its flexible and fully encapsulated construction, FLEX 14×14 is suitable for cove lighting, ceilings, walls, furniture, niches, architectural accents, curved surfaces, commercial interiors, residential spaces and decorative installations. Its configurable design allows it to follow complex contours while maintaining consistent illumination and reduced maintenance requirements.

Divinity Lights manufactures customized lighting solutions according to clients' specific requirements, making FLEX 14×14 suitable for tailored architectural and decorative lighting projects.
