

HEXAGON CATENARY LIGHTS

Direct | Catenary

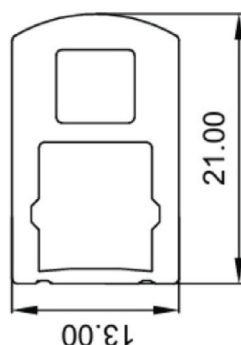

HEXAGON CATENARY LIGHT is a contemporary suspended outdoor luminaire designed to provide functional and decorative illumination across large open architectural and landscape spaces. Featuring a clean hexagon profile and a slim aluminium die-cast housing, the fixture delivers an elegant visual presence while providing uniform illumination with minimal multiple shadows. Its catenary-mounted design makes it ideal for installation over plazas, pathways, walkways, public spaces, courtyards, outdoor dining areas and architectural landscapes. The luminaire is available with multiple finish options and customized RAL colours to complement different environments.

With a 600 mm diameter and 21 mm overall height, HEXAGON CATENARY LIGHT combines a slim construction with a distinctive circular form. Its aluminium die-cast housing and finned heat-sink design help dissipate heat and support reliable performance, while the suspended configuration provides efficient area lighting without obstructing pedestrian movement. Divinity Lights provides customized lighting solutions according to clients' specific project requirements.
